1 First

This is a simple example of using the `ledmac` package with ordinary LaTeX constructs.

1.1 Example text

The `ledmac` package lets you do some unusual things in a LaTeX document. For example you can have lines numbered and there are several levels of footnotes. You can label lines within the numbered text and refer to them outside. Do not try and use any normal LaTeX `marginpars`¹ or `exotica` within the numbered portions of the text.

Sidenotes
are OK

2 Last

I forgot to mention that you can use ordinary footnotes^{2,3} outside the numbered text. You can also^a have^b formatted footnotes^c in normal^d text.

There are 5 numbered lines in the example shown in section 1.1.

*Standing on the shoulders of giants.

¹You will get a warning but no text.

²An ordinary footnote

³And another

^aAdditionally ^bSpecify ^cLike this ^dText that does not have line numbers

2 several] This is an ‘A’ footnote.

4 `exotica`] Like floats.

2 levels] This is a ‘B’ level footnote.
